Individual cages for rabbits

The easy to use rabbit cages offer the best husbandry practice due to their size and shape. Depending on the choice of the

materials cage trays are heat-resistant up to 90° C or 120° C.

Rabbit cages

The BIOSCAPE rabbit cages are manufactured under compliance also consideration of international statutory, the EU-directive 2010/63/EU of the European Parliament, 22th Sept. 2010 (formerly ETS 123).

Cages box with removable tray, rack with rear and side walls.

They combine:

- High level of flexibility: the racks can be plugged together due to removable partition walls, these walls can be removed (without tools) and you get double or four times more floor area.
- Cages with 10 cm elevated trays and dung bowls are made of LURAN (heat resistant up to 90° C). Also available in autoclavable NORYL.
- Elevated raised shelf of the tray can be turned up; this allows easy remove of the cage trays without removing the whole cage.
- Every metal support is made of stainless steel AISI 304.
- The castors have a diameter of Ø 100 mm, 2 of which have brakes.
- The racks can optionally be equipped with automatic watering device.
