INTERVENTIONAL  
SYSTEMS

# Experience Pre & Post-dilatation with no compromise.

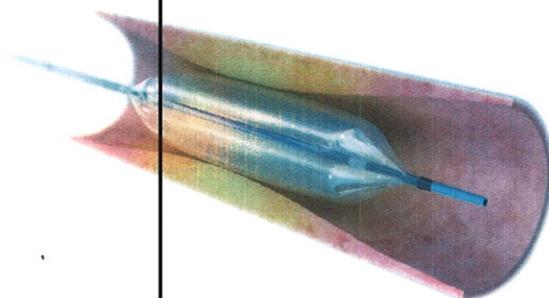

## PROVIDE IMPRESSIVE HIGH PRESSURE RESISTANCE UP TO 22 ATM

The innovative triple layer technology of Accuforce consists of :

Soft inner/outer elastomer layers offer resistance to high pressure from the inside and against damage to the outside.

Stronger middle layer in polyamide, which provides an additional and safer<sup>(1)</sup> high pressure resistance required for severe calcified lesions.
