

Falcon® Round-Bottom Tubes

- ▶ Widely used and referenced in laboratory protocols
- ▶ Dual position snap-cap prevents sample loss with ease of handling
- ▶ Sterile, nonpyrogenicity tested to less than 0.1 EU/mL

Sterile tube with cell-strainer cap
Designed for flow cytometry applications, the 12 x 75 mm tube with cell strainer cap (Cat. No. 352235) offers a convenient way to prepare laboratory samples. A 35 µm nylon mesh is incorporated into the tube cap, which can be used to collect the dissociated sample for downstream processing in instruments.

White graduations on 14 mL polypropylene tubes
Falcon brand 14 mL polypropylene tubes feature white printed graduations rather than traditional molded-in graduations. Easy-to-read markings and a solvent-resistant writing patch provide further convenience in use.

The foundation for consistent research results

- ▶ Provide reliable containment of laboratory fluid samples
- ▶ Widely referenced in published procedures and protocols
- ▶ Polypropylene tubes are best suited for applications requiring greater thermal and chemical stability
- ▶ Polystyrene tubes are best suited for procedures requiring high optical clarity
- ▶ Dual-position snap caps, heavier gauge walls, and unique construction provide a secure, positive seal
- ▶ Medical-style packaging materials

Tips

- ▶ Tubes with more consistent inner tolerance, such as the Falcon 5 mL round-bottom tubes, reduce maintenance and wear of the Bal Seal O Ring resulting in less down time and costly repairs of valuable instruments.

* RCF claims refer to Relative Centrifugal Force measured in g-force for materials with a specific gravity of 1.0, used in an appropriate rotor with correct cushion and safety precautions. Tubes used with organic solvents at temperatures below 0°C may have lower RCF ratings.

Tips

- ▶ Racks for 15 mL Falcon Conical Tubes are also ideal for upright storage of Falcon 17 x 100 mm Round-Bottom Tubes.
- ▶ Expanded polystyrene racks are not recommended for storage below 0°C.
