1. Digital Visual Acuity Chart System VLC-1900 / VLC-2400(P) (New System)

➤ DISTINGUISHED FEATURES

Window CE Embedded Type Visual Acuity System

-Window CE Embedded type of VLC chart system is more stable than computer based system and needs not additional accessories

-VLC chart system needs not cooling fan as it generates less heat while in operation

- Booting Time: Less than 25 seconds

Special Charts & Various Precise Examination

-VLC chart system helps various and precise exam including Binocular Balance, Aniseikonia, Streopsis, Binocular Fusion, Suppression, Strabismus, Phoria, Color Blindness and Amsler Grid Test with more than 100 charts

Wide Viewing Angle & Clear Chart

-VLC chart system adopts high resolution 19-inch (1280 x 1024)&24-inch (1920 x 1080) reliable industrial LCD panel with wide viewing angle which provides clear chart and removes the image distortion as well

User friendly function for test distance adjustment

-Viewing distance can be adjusted in accordance to the space of test room

- Viewing Distance is selectable by 0.25M or 0.5M step within 1.5M (Min) ~ 8.0M (Max)

Networking Function

-VLC chart system communicates with compatible automatic phoropters

Wired / Wireless Remote Control with LCD Window

-VLC chart system support both wired / wireless remote control

-High brightness of LCD panel enhances user convenience at dark eye exam circumstances

-Remote control needs not replacement of Battery according to the adoption of rechargeable Lithium-Ion Polymer internal battery

SPECIFICATIONS

Model	VLC - 1900	VLC - 2400(P)
LCD Type	19 inch (SXGA) TFT LCD	24 inch WUXGA TFT LCD

	Wired	RS232 Communication
Dimension / Weight	(W) 436 X (H) 362 X (D) 59.55mm / 5.5Kg	(W) 621 X (H) 428 X (D) 76mm / 12Kg
Remote Control	(W) 69.5 X (H) 235.5 X (D) 26mm / 200g / Rechargeable Battery	
Data Interface	USB	USB, RS-232
Standard Accessories	Wall Mount Bracket, Desk-top Stand	Wall Mount Bracket
Optional Accessories	Poll type Floor Stand, Red/Green Glasses, Pola Glasses	

User friendly Function

12. Black / White Reverse

10. Black / White reverse function helps Cataract and Lasik patients recognize charts easily

11. Contrast Sensitivity Adjustment

-VLC chart system helps examiner test with Cataract patients using contrast sensitivity adjustment

-They enable the examiner adjust to 10 steps.

10. R / G Filter Adjustment Function

-VLC chart system provides 32steps of R / G filter density that can be used in accordance with test circumstances

-All of Red/Green color charts can be reversed

10. ETDRS Adjustment Function

-Position of opto-types of ETDRS-1 and ETDRS-2 can be changed by pushing a button on remote control

Random Function

-VLC chart system provides various charts with differently order opto-types with Number, Alphabetic, Landolt, Snellen opto-types in order to protect the memorizing the order of opto-types bt patients

14. SLIDE SHOW Function

-VLC chart system can store 18custom images in SD card and displays the images while the system is in power saving mode. And the images change in 5 or 10 seconds

-6 kinds of eye movement test charts during Slode mode.

-4 kinds of Amsler Grid for Macular Degeneration.

-Animation for making a child concentrated during test .

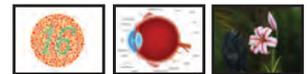

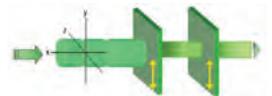

Chart Selection Function

-An examiner can select one of both Non-pola and Pola chart.

Best Polarization Performance

-VLC-2400 P

-Polarization of 24-inch full screen

-Optical polarization glass panel

-Precise eye exam available using special charts

Various System Placements and Accessories selectable

VRK-2400 Auto Ref-Keratometer

REFRACTION & KERATOMETRY MEASUREMENT

VRK-2400 Provides an extensive range of dioptric measurement range. It covers -25D to +22D, and the radius of curvature for keratometry is 5.0mm to 10.2mm. Owing to its easy alignment and friendly operation you can measure the refraction and keratometry in a sequency, the results can be checked all at once.

DIAMETER MEASUREMENT

Using the VRK-2400's Freeze Function, you can measure the diameter of the cornea, pupil or hard contact lenses worn by an examinee. Since the image of the eye is frozen, the process is both easier and more precise.

AUTOMATIC POWER SAVING

When the VRK-2400 is not in use more than 5minutes, a built-in power saving function eliminates current to the TV monitor and lighting circuitry. It conserve energy and prevent any build-up of heat from electronic circuitry, increasing its useful life.

COLOR PHOTO TARGET

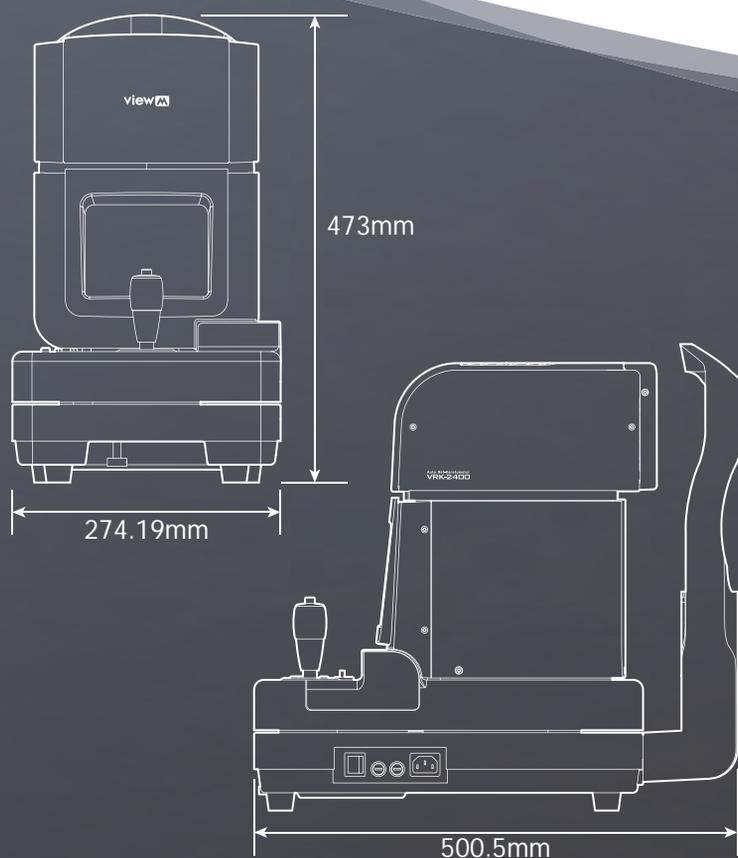

This color photo target with wide angle of view allows the exami-nee to be more relax-ed, making eye fixation easier. The auto-fogging function reduces the effects of instrument myopia and patient accommodation, especially helpful with children and patients with difficult eyes.

DISPLAY DATA INSTANTLY

Through monitor, you can see the results (maximum of 10 data for each eye) of measurements stored in memory. Also it can be printed out using built-in printer.

VARIOUS MEASUREMENT AND CONVENIENT USE

- Dual and single measurement mode selection button for refractometry, keratometry and contact lens base curve(CLBC)
- Switch button for automatic and manual measurement mode including pupil distance(PD) measurement for both near and far vison
- Retro illumination mode button for the measurement of cornea, contact lens and crystalline lens
- Size mode button for the measurement of cornea and pupil diameter
- Chinrest moving up and down button
- Print - out button
- Intraocular lens(IOL) mode button for the measurement of eye with cataract and IOL

Auto Phoropter

VDR-2400 Digital Refractor
DIGITALIZED REFRACTOC BY VIEW-M

VDR-2400 enables exact and fast eye test with more accuracy by the function of diversified and precise eye examination. Digital type of VDR-2400 is very accurate.

The measuring procedures are easy for optician's convenience.

It will certainly assist you to do precise eye examination.

VDR-2400 DIGITAL REFRACTOR

DIGITALIZED REFRACTOR BY VIEW-M

Outstanding Feature

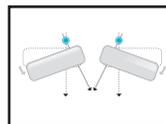

- **Automatic PD control**
Automatic PD setting by the data transferred from auto ref/keratometer and Individual PD adjustments by using keys are available.

- **6.4inch Full-colored LCD panel**
The wide(6.4inch) full-colored LCD panel supply the high convenience for the operator.

- **Tilting Monitor**
Operation Panel Monitor tilted to supply the high visibility for the examinee.

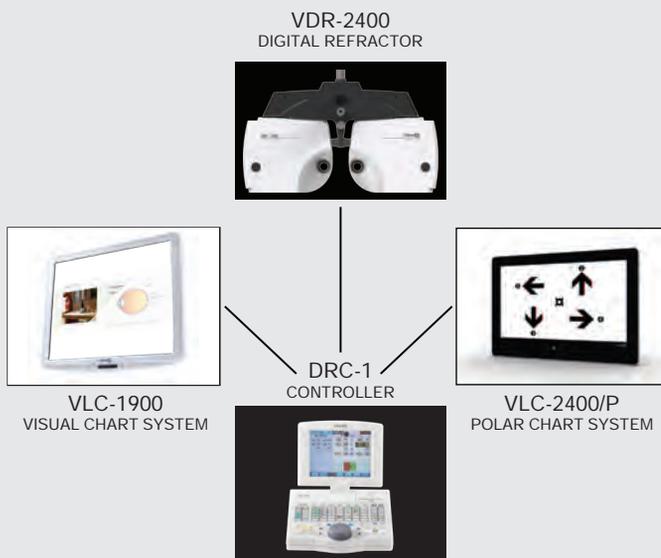

- **Convergence for accuracy**
For the presbyopia and near vision test, convergence is required for the accuracy.

- **Convenient function key**
Through well arranged function keys, high-efficient refractor test and quick chart selection are available.

 - Intraocular lens (IOL) mode button for the measurement of eye with cataract and IOL
- Compatible with automatic Phoropter through RS232 Communication**
- High-speed Measurement Result Printing**
- Wide Measurement Range**
 - Refractometry : -25D ~ +22D
 - Keratometry : R5mm ~ R10mm
- Large Size and high Resolution color LCD Monitor**
 - Find display of iris image and alignment marks
 - 6.4 inch, 0.3 mega pixel LCD panel
- Easy and convenient User Interface**
- Safety**
 - Fuse for excess electric power shock protection
 - Clamping bolt for base locking
