# NaviCross®

0.035" / 0.89 mm Support Catheter

Your first choice peripheral support catheter

## Stainless Steel Double Braided Shaft

- ▶ Provides excellent steerability and efficient push transition in complex lesions
- ▶ Enhances torqueability and prevents kinking

## Minimal Crossing Profile and Tapered Tip

- ▶ Guarantees a seamless transition between guide wire and catheter facilitating successful lesion access and crossing
- ▶ Angulated tip can be used for selecting the true lumen and navigating through bifurcated vessels

## Unique Three Radiopaque Shaft-Markers

- ▶ Feasibility of accurate intraluminal measurement (e.g. assessment of treatment dimensions/positions of balloons and stents), because embedded shaft markers are positioned 1 mm from distal tip
  - 40mm and 60mm from precedent marker band

# NaviCross®

## Specifications

- Double braided stainless steel shaft
- 65, 90, 135, 150 cm lengths
- 0.035" / 0.89 mm wire compatibility
- 1 embedded and 2 swaged radiopaque markers
- Straight and 30° angled tip
- 4 Fr sheath compatibility
