ENDOVENOUS APPLICATION

### Versatility

The neoV series supports a wide array of medical applications. It provides the latest technologies for endovenous treatments with the introduction of the CORONA Infinte Ring fiber and the ultra high water absorption of the 1940 nm wavelength. It offers a superb 1470 nm system, with high precision, for EVLA, Proctology and PLDD use, as well as a high power 980 nm system for ENT and Spider Vein treatments.

### World-Class Design

The neoV truly stands apart from the industry in terms of design and craftsmanship. Through use of unique materials and cooling technology, the laser unit is a fraction of the size and weight of other lasers on the market, providing an unparalleled level of portability and flexibility in setup within the OR, clinic or office.

### Best-in-Class Performance

The neoV platform offers unprecedented performance of form, fit, and function. The laser provides up to 28 Watts, stable output power and supporting a variety of fiber dimensions, from 300 micron to 600 micron, providing you with flexibility, and versatility.

### Superb Quality and Safety

For us quality and safety come first. The unit offers superb quality, and is backed by a full 2 year warranty. You should be confident that the neoV unit provides you with the best-in-class quality device on the market today for your vascular, surgical, or aesthetic applications.

PROCTOLOGY

### Global Impact

The neoV is the highest growth endovascular and colorectal platform in the world today. Within 2 years of introduction, the platform has been adopted by over 30 countries, with core growth in quality sensitive markets like Germany, Netherlands, and Australia. With key training sites in Germany and thousands of procedures on a monthly basis, the neoV is a top notch and clinically proven platform.
