Suction Connecting Tubing

A complete system to connect suction sources to suction waste collection systems, suction catheters, yankauers, suction probes and other suction devices. Pennine offer a range of easily connected, interchangeable products in a choice of tubing length and diameter.

Sterile double wrapped individual peel pouches.

F' (Female) connector fits suction machines and male tapered

p.d.163

'M' (Male) connector push fits into the 'F' connector and is normally used to connect to the standard funnel fitted on suction catheters. Can also be used to connect lengths of tubing together for

p.d.162

Application of 'M' connector with 'VC' (vacuum control) vent converts a standard catheter to vacuum control application

Link Suction Connecting Tubing / Bubble Tubing

The Pennine Link system is used for connecting suction sources to suction waste collection systems, suction catheters, yankauer suckers, suction probes and other suction devices. Tubing extruded with an integral female funnel and a tapered male end to provide adaptable connections. The tube can be modified by cutting with scissors.

This unique system will guarantee an easy and faultless connection between all the individual products in the Link range. Link Tubing is also referred to as Bubble Tubing.

Although the Link products are optimised to be used within the Link system, they can also be easily connected to other products in our range.

- Sterile, double wrapped transparent individual peel pouches
- Disposable PVC tubing
- Available in two diameters, 5mm & 7mm

Available either in plain PVC or with an antistatic black line to prevent static discharge (also known as conductive tubing)

Box Link Suction Connecting Tubing / Bubble Tubing

LINK tubing available in 30 and 50 metre lengths, three diameters: 5mm, 6mm and 7mm supplied in convenient dispenser boxes. Tube extruded with a bubble at every 0.90m intervals. Simply cut through the bubble at the required length to create either a male or female end which will fit a suction tip or suction catheter.
