9mm 'Antique' Self Adhesive Lead - 50 Mtr

Description

Our Self adhesive profiles are made with 99.5% pure lead which is modified with a small amount of antimony to improve its weathering performance and surface polish. A high performance, acrylic, pressure sensitive adhesive ensures a long life span in both single glazing and in double glazed units. All our products are manufactured to ISO 9001:2015 quality standards and have been tested in units complying with the European standard EN1279. Our coated lead products have been fully weather and age tested to the ASTM-G53-96 standards.
