Integra™ Omni-Tract®

Table Mounted Wishbone® Retractor Systems

Limit uncertainty with flexibility for any approach.

Manufacturer of the Omni-Tract® Wishbone® Table Mounted Retractor Systems

Omni-Tract® Surgical has over 30 years of experience in table mounted retractor design. The concept of securing the retractor frame to the O.R. table rail allows you to place retractor blades at any angle with exact pressure for unilateral, bilateral, single or multi-level exposures.

Table mounted retraction eliminates hand held retractors and self retaining retractor migration. Wishbone® retractor systems perform consistently on all patient sizes, and can be used in multiple surgical specialties.

Retract from every direction by simply adding our hinged extension arm.

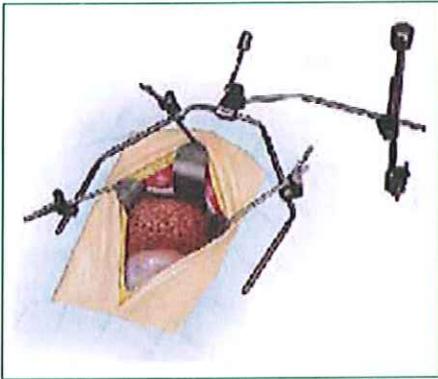

Table Mounted Wishbone® Retractor Systems

General Surgery	3-4
Vascular Surgery	5-6
Urologic Surgery	7-8
Pediatric Surgery	9-10
Containers	11

Integra™ Omni-Tract®

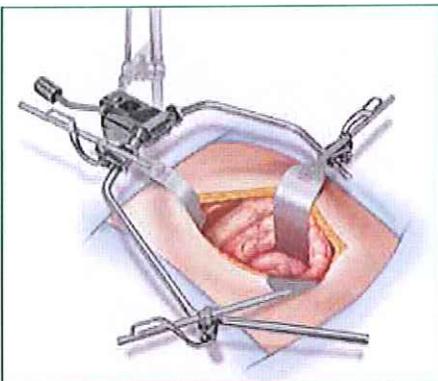

General Surgery Retractor Systems

Table Mounted Retraction for Unparalleled Exposure in General Surgery Procedures

One-piece Wishbone® Retractor Systems

- One piece Wishbone® Frame allows body wall and deep retraction regardless of patient size and anatomical structure
- Multi positional blades firmly retract from any plane
- Low profile system follows contour of operative field
- Optional hinged extension arm encloses the operative site for 360° retraction
- Wishbone® Frames have SnapClamps® for quick blade placement.

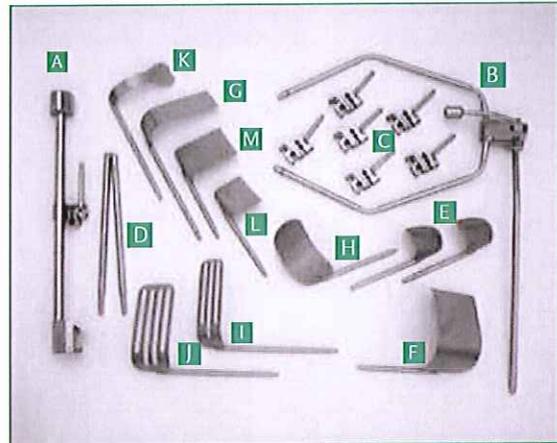

Flexible Wishbone® Retractor Systems

- Flexible Wishbone® Frames have interchangeable, removable frame arms that allow you to maximize your surgical field
- Strength – no matter your patient size the Flexible frame arms are designed to remain stable, so you will always get the exposure you need
- Hinged extension arm is also available so you retract from every direction if needed

Wishbone® Systems can be used in general surgeries including:
Gastric Resection, Exploratory Laparotomy, Open Cholecystectomy, Splenectomy and Gastic Bypass procedures.

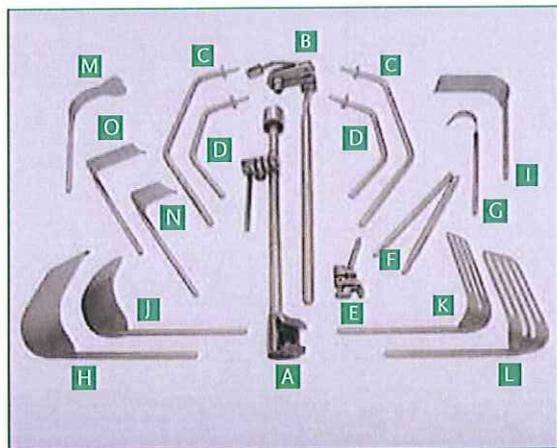

One Piece Wishbone® General Surgery System

Integra™ Omni-Tract®

Pediatric Surgery Retractor Systems

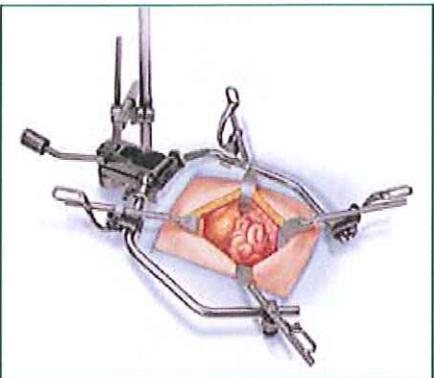

Table Mounted Pediatric Wishbone® Retractor Systems

One-piece Wishbone® Pediatric Retractor Systems

One piece Wishbone® Retractor system designed for pediatric procedures. Small, independently-adjustable, low-profile frame arms follow contours of the operative field

- Multi-plane, multi-positional hands-free retraction
- Accommodates variation in patient size
- Wishbone® Frames have SnapClamps® for quick blade placement.
- Can be used on infants, toddlers and adolescent patients

Flexible Wishbone® Pediatric Retractor System

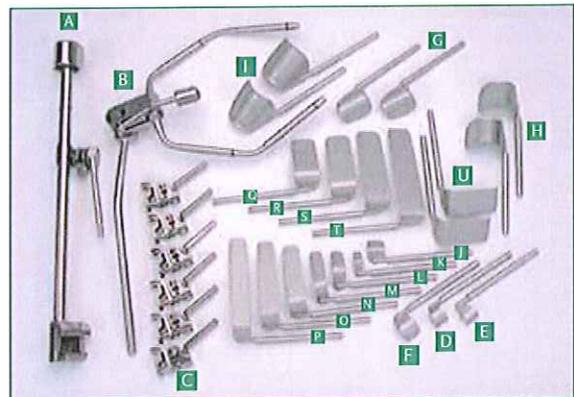

Flexible Wishbone® Retractor System designed for pediatric patients of all sizes.

- Small, independently-adjustable and removable frame arms follow contours of any pediatric operative field
- Multi-plane, multi-positional hands-free retraction
- Easily accommodates the range of pediatric patients from infants to adolescents

Wishbone® Systems can be used in pediatric surgeries including: Pediatric Transplant and Nissen Fundoplication procedures.

BIOPSIJOS

INSTRUMENTAI IR ADATOS

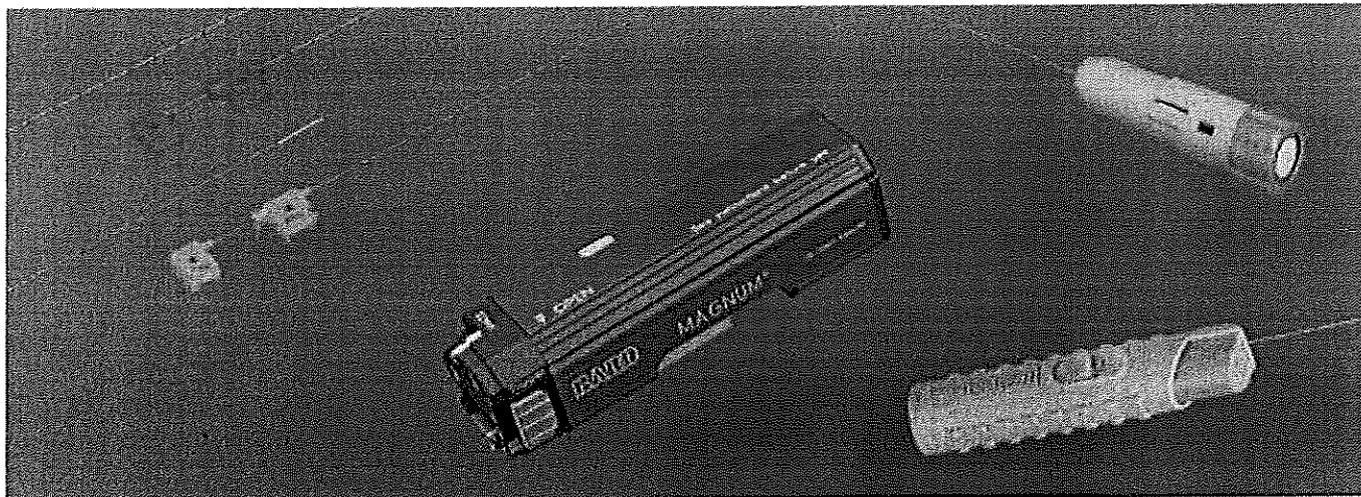

Padeda Jums gauti kokybiškesnius
ir patikimesnius branduolio
mėginius.

BARD | MEDICAL

29

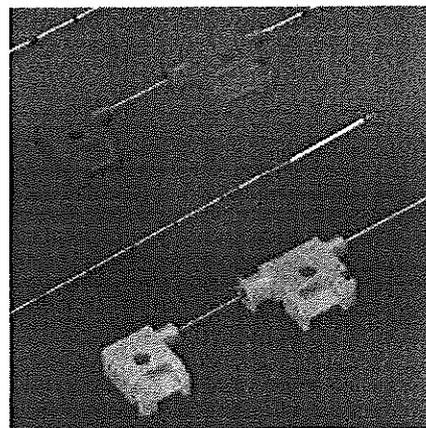

Padeda Jums gauti kokybiškesnius ir patikimesnius branduolio mėginius.

Kiekvienas **Bard biopsijos instrumentas** ir kiekviena **adata** yra specialiai sukurti padėti Jums pasiekti vieną iš svarbiausių tikslų: aukšta kokybė ir patikimi branduolio mėginiai. Visos adatos yra sukurtos išskirtiniam našumui pasiekti naudojant ypač aštrius antgalius ir poliruotą paviršių švelniai antgalio įvesčiai ir išvesčiai. Platus biopsijos sistemų ir adatos dydžių pasirinkimas užtikrina idealią atitikti procedūrinėms adatoms ir asmeniniams poreikiams.

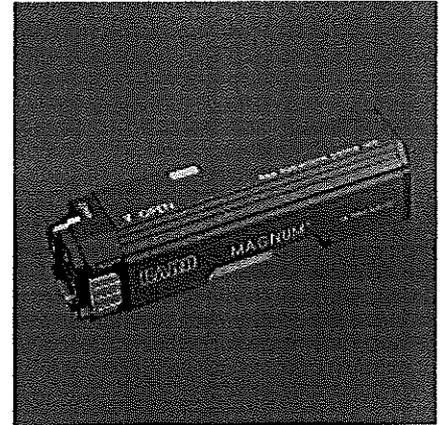

Bard® Magnum® instrumento adatos

- Ypač aštrus adatos troakaras, skirtas surinkti pastoviai aukštesnės kokybės branduolio mėginius su minimaliu sutraiškymu.
- Įsiskverbimo gylių pasirinkimas prieigai prie sėklidžių ir sėklinių pūslių biopsijai atlikti.
- Išgraviruotas adatos galius geresnei adatos padėties vizualizacijai naudojant ultragarso orientyrą.
- Spalviniai kodai ant centrų lengvesnei identifikacijai atlikti.

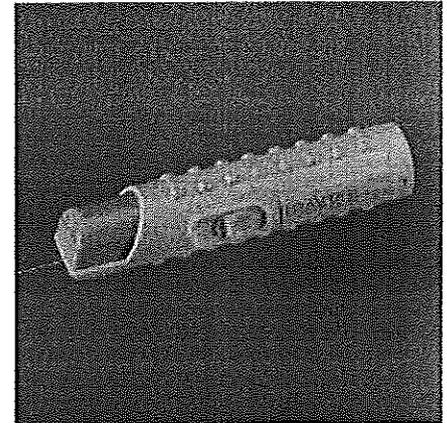

Bard® Magnum® instrumentas

- Galinga dviejų spyruoklių sistema pastoviems aukštos kokybės branduolio mėginiams gauti bei greitam šovimo veiksmui gauti.
- Mažo dydžio, lengvo svorio instrumentas skirtas naudoti vienam vartotojui.
- Vienos rankos aktyvavimas suteikia lengvą prieigą prie audinio mėginio.
- Dvigubas įsiskverbimo gylis lankstumui ir patikimumui (22 mm arba 15 mm).

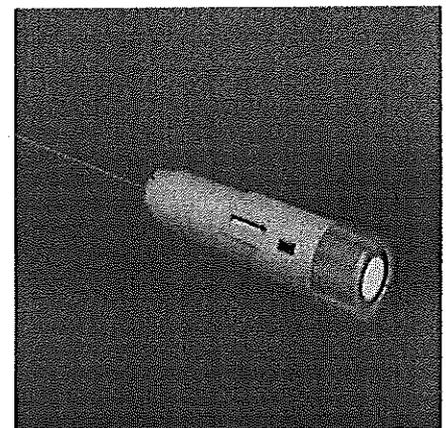

Bard® Max•Core® instrumentas

- Galima naudoti tik su viena ranka greitesniam, lengvesniam panaudojimui suteikiant daugiau kontrolės mūvint pirštine.
- Dvigubas gaidukas suteikia lankstumo; gydytojas gali naudoti skirtingas biopsijos technikas.
- Aštrus nuožulnus troakaras mėginio surinkimui su mažiausiu sutraiškymo artefaktu.
- Pakreipta, gili mėginio anga dideliame aukštos kokybės branduolio mėginio surinkimui.

Bard® Monopoty® instrumentas

- Sukama rankena lengvam branduolio mėginio išėmimui; greitas ir lengvas naudoti.
- Mažo svorio ergonomiška rankena didesnei kontrolei mūvint pirštine.
- Aštrus nuožulnus troakaras mėginio surinkimui su mažiausiu sutraiškymo artefaktu.
- Pakreipta, gili mėginio anga dideliame aukštos kokybės branduolio mėginio surinkimui.
