

Squared containers, graduated up to 2,7 litres

CE (IVD)

High density polyethylene container and cap. Ideal for 24 hour urine collection and other liquid samples. The ribbed cap features a pharmaceutical grade joint, which eliminates the need for an insert plug, allows a better handling and provides a watertight seal.

Containers are graduated in 50 ml increments up to 2.7 l. Ergonomically designed for single-handed use.

Stackable. A ring on the neck of the containers avoids dripping when pouring.

Base: 115 x 115 mm

Height, cap excluded: 249 mm.

Individually wrapped models are supplied capped.

Cases per pallet: 12.
