

vienkartiniai spo2 davikliai

Why FMT Disposable SpO2 Sensors?

Features

- Ideal for extended monitoring or minimizing the risk of infection where the risk of cross-contamination is high.
- Special design that ensures easy and accurate sensor placement and functionality.
- Made of flexible shielded cable, high accuracy electronic components.
- 3M Microfoam™ foam type or Medaplast™ fabric type adhesive materials.
These adhesive materials with medium adhesion maximize patient comfort and allow the sensor to be easily moved and quickly reapplied when repositioning.
- Four sizes of comfortable and accurate disposable sensors designed to fit adult, pediatric, infant and neonatal patients. They are compatible with major leading manufacturers of patient monitoring and pulse oximetry systems.
- High signal accuracy. Accuracy is $\pm 2\%$ between 70%-100%, below 70% unspecified. SpO2 range 30%-100%
Added Faraday cage and shielding feature reduces the effect of magnetic interference from the environment and increases the accuracy of the measurement. All disposable sensors have two different layers of opaque material, covering electronic components for minimizing effects of ambient light.
- Provide accurate measurements for mobile patients, patients with low perfusion and low body temperature.

Sold in 24 pieces per pack. Non-sterile

Latex-free and meet industry standards for biocompatibility.

spo2 matavimo intervalas
30%-100% ribose

tikslumas 70-100% +/- 2 proc.

tinkami mažesniems nei 3 kg pacientams

FMT-DVF Series single patient use SpO2 sensors

Due to the non-adhesive Velcro design, the repositioning of the sensor is possible for many times without deforming the sensor body.
