

Impedance Tube AcoustiTube® – Module „Sound Absorption“

Specimen Holders

- depending on the application, there are different specimen holders available

diameter 100 mm for laboratory testing + special adapter
to connect 3D-printed meta-material structures to measure sound absorption

diameter 100 mm for in situ testing
of dense asphalts
(Module „Sound Absorption In situ“)

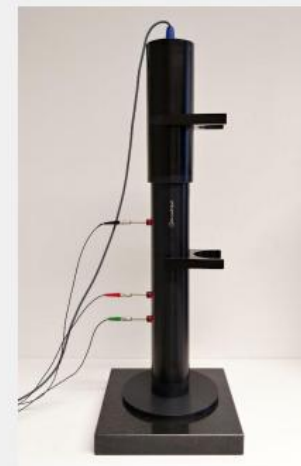

Impedance Tube AcoustiTube® – Module „Sound Absorption In situ“

Calibration Normal

- calibration normal for in situ testing of dense asphalts

polished and fased granite plate
with handle bars

test setup for
calibration measurement
