Dräger Com Control Units

Dräger C-C440

The Dräger C-C440 is an easy to operate push-to-talk button which simplifies the communication via the tactical radio. The large push-to-talk button of the Dräger C-C440 makes it the first choice for operations when wearing the device under protective clothing (e.g. chemical protection suit).

The 4 pole Nexus adaptor allows a flexible connection of a headset or mask communication to the radio unit. The C-C440 is extremely stable, robust and waterproof (MIL STD 810G and IP67) to resist all operational conditions.

Depending on the radio, the unit can be ATEX approved for usage in potentially explosive environments.

Dräger C-C550

Successor of C-C500-series. The Dräger C-C550 includes both: an integrated microphone and speaker, which gives a flexibility of use as the device can be used with headset, but also without a connected head-set.

It eases the use of the tactical radio significantly. The two large push-to-talk buttons allow an easy voice transfer, even when wearing the device under protective clothing. The C-C550 is extremely stable, robust and waterproof (MIL STD 810G and IP67) to resist all operational conditions. Depending on the radio, the unit can be ATEX approved for usage in potentially explosive environments.

The Dräger Com Control units can be connected to over 350 different radios. Order information and radio compatibilities shall be taken from the attached table or our Compatibility List.

In case of enquiries for Com-Control units, which are not shown in the list, please contact Dräger.

„Dräger Com“ valdymo blokai

„Dräger C-C440“

„Dräger C-C440“ yra lengvai valdomas „push-to-talk“ (*spausk ir kalbėk*) mygtukas, kuris supaprastina ryšį per taktinį radiją. Dėl didelio „Dräger C-C440“ mygtuko „push-to-talk“ šis prietaisas yra pirmasis pasirinkimas, nešiojant po apsauginiais drabužiais (pvz., po apsauginiu kostiumu nuo chemikalų).

4 polių „Nexus“ adapteris leidžia lanksčiai prijungti ausines arba kaukę prie radijo ryšio įrenginio. C-C440 yra itin stabilus, tvirtas ir atsparus vandeniui (MIL STD 810G ir IP67), todėl tinka naudoti bet kokiomis eksploataavimo sąlygomis.

Priklausomai nuo radijo, įrenginys gali būti ATEX patvirtintas naudoti potencialiai sprogiose aplinkose.
