External Aluminium Nasal Splints

External aluminium or thermoplastic nasal splints belong to the basic equipment found in ENT-Surgery, Casualty and Accident and Emergency Units.

The material properties offer user and patient many advantages over standard plaster of paris bandaging. They can be applied quickly and efficiently, provide stable protection and are optically much less conspicuous.

- Padded Aluminium Nasal Splint
- Easily malleable
- Self-adhesive back
- Four sizes available
- Self-adhesive Dorsum foam pad included
