PRODUCT

Monoart® Disposable latex gloves

Monoart® disposable examination gloves provide hygienic, comfortable protection for your hands. They are strong, stretchy and designed to guarantee outstanding tactile sensitivity. The polymer lining ensures that they are particularly easy to put on and reduces the risk of skin irritation. In addition, the rough micro-texture on the surface gives superb grip in all conditions. Use them in conjunction with the rest of the Monoart® range to give your dental practice a unique look.

- Latex powders-free
- Not sterile
- Ambidextrous
- AQL 1,5

box • bag of 50 pieces

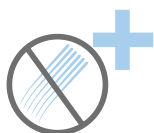

Monoart® Protective glasses

Euronda and Univet together to grant you the maximum protection and safety.

From Univet to Euronda, and from Euronda to you.

- 1 Basic treatment ANTI-SCRATCH**
protects against scratches and abrasions
*K Anti-scratch treatment

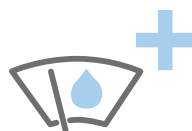

- 3 ANTI-SCRATCH PLUS treatment**
Constitutes a barrier against surface damage, it protects against scratches and abrasions. It is certified according to the requirement of EN166 "K".

- 5 UDC Univet Double Coating**
The revolutionary coating created through UDC technology provides to your eyewear superior resistance from scratches and fogging for outstanding performance in any working condition.
Deposition of coatings in separate processes on the surfaces of the lens:
- exclusive anti-fog coating inside the lens
- multilayer scratch-resistant coating outside the lens.
Both treatments are permanent and assure to the product an highly superior performance to EN 166 standards.
This technology is expressed in Monoart® Stretch Orange glasses.

- 2 Basic treatment ANTI-FOG**
that prevents the formation of condensation.
*N Anti-fog treatment

- 4 ANTI-FOG PLUS treatment**
It's a permanent treatment that prevents the formation of condensation. It is certified according to the requirement of EN166 "N".

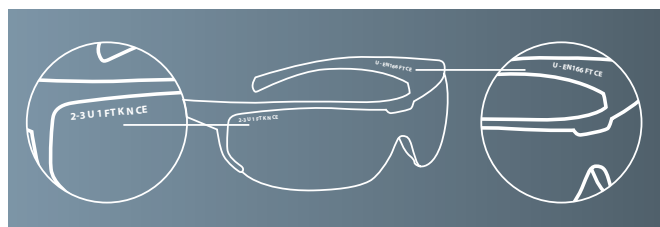

- 6 SOFTPAD technology**
SoftPad is a patented terminal that has been added to the arm of the eyewear to offer comfort and protection. Thanks to the innovative use of materials and a meticulous design, the ergonomics of these glasses reach a new level of comfort, providing perfect stability to the safety glasses and full adaptability to the face of the user.
In addition to the length adjustment in 3 positions, the SoftPad system has a further tilting movement that allows the device to fit perfectly to the user's head.
The SoftPad system is supplied with the Monoart® Cube glasses Monoart® Stretch glasses.

Eyewear marking

Added to personal protective equipments (PPE) the marking guarantees respect of current safety regulations. Required by the law, the marking is added both on the lens, to identify scale number, manufacturer, optical class, mechanical resistance and optional requirements, and on the frame to identify manufacturer, reference normative and mechanical resistance.

European Normatives

EN 166 Personal eye-protection - Specifications / EN 167 Personal eye-protection - Optical test methods
EN 170 Personal eye-protection - Ultraviolet filters. Transmittance requirements and recommended use

Lens marking identification

2-3	U	1	FT	KN*	CE
Scale number (n.code+ shade)	Manufacturer	Optical class	Mechanical resistance	Optional requirement	

Frame marking identification

U	EN 166	FT	CE
Manufacturer	Standard	Mechanical resistance	

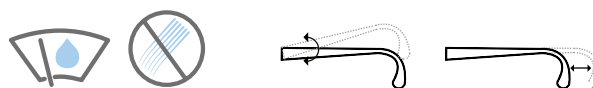

Monoart® Spheric glasses

Protective glasses for operators or patients with single optically controlled spherical polycarbonate lens that guarantees UV ray protection and a field of view of 180°. The length and angle of the frame stems are adjustable and made from over moulded material to guarantee excellent fit and comfort. Polycarbonate nose bridge. Neutral colourless scratch-proof and anti-misting lens that protects against impacts and UV rays to guarantee optimal visibility. Lenses conform to EN166 and EN170 standard requirements.

- Weight: 36 g

box • single pack

pack • carton of 10 pieces
