

ICEM® SELF ADHESIVE – THE EASIEST WAY OF CEMENTATION

iCEM Self Adhesive is an All-in-One resin luting cement that combines reliable bond strength and quick, easy, convenient application with a reduced risk of postoperative sensitivity. This means that indirect restorations can now be etched, primed, bonded, desensitised and cemented in just one step.

Numerous scientific studies have proven that the innovative formula of iCEM Self Adhesive combines the advantages of classical cements with the high-quality mechanical and aesthetic properties of resin luting cements.

Indications

- Cementation of metal, metal-ceramic and all-ceramic crowns and bridges
- Cementation of metal, ceramic and composite inlays
- Cementation of metal, ceramic and composite onlays
- Cementation of metal, titanium and glass fibre root posts
- Retention of nylon materials for splinting loose teeth

Benefits

- Reliable bond strength for durable restorations
- Tested in numerous scientific studies worldwide
- Reduces postoperative hypersensitivity
- Etching, priming, bonding, desensitising and cementation in just one step

PRODUCT OUTLINE

ICEM SELF ADHESIVE

Syringe Refill

Contents

1 Automix syringe x 5 ml (7 g)
15 Mixing tips
Pictorial card

Art. code 6603 6084

Syringe Value Pack

Contents

3 Automix syringes x 5 ml (7 g)
45 Mixing tips
Pictorial card

Art. code 6603 7633

Mixing Tips Refill

Contents

50 Mixing tips

Art. code 6603 6085
