EMERGENCY BAGS - POLYESTER OR POLYESTER PVC COATED

POLYESTER

POLYESTER WITH OUTER PVC COATING

- 27165 EMERGENCY BAG - polyester - red - 35x45xh 21 cm
 - 27166 EMERGENCY BAG - polyester PVC coated - red - 35x45xh 21 cm
 - 27167 EMERGENCY BAG - polyester PVC coated - blue - 35x45xh 21 cm
- Capacious bag, despite the compact size. Large central compartment, 1 front and 3 lateral pockets. May be carried on shoulder (braces) or hand (2 handles).

Made in strong, water resistant material (600D polyester). Available also with outer PVC coating (27166-7). Provided with yellow reflective strips and rubber bottom.

HEINE mini3000® Otoscope

5.2.1.P.d. Otokopas dviejų dalių rankena ir galva.

- > Modern pocket otoscope
- > Switches off automatically
- > Optional rechargeable handle

5.2.5. ir 5.2.9.P.d. Automatinis išjungimas.

Modern pocket otoscope with direct illumination

Modern pocket otoscope in a unique, compact design. Can only be used with the mini3000 handle system. Available in black or blue.

5.2.2.P.d. Xenon helogeninė lemputė 5.2.3.P.d. Apšvietimas, refleksinis ausies kanalams

- > Instrument head matt-black inside. Eliminates reflexes.
- > Enhanced XHL Xenon Halogen Technology with 100% more light compared with conventional bulbs. Very bright, concentrated white light for perfect illumination.

5.2.4. P.d. Vaizdas 3x padidinimu ir optimizuoto korpuso paviršiumi, minimalus atspindys.

- > Viewing window with 3x magnification and optimised casing surface for razor-sharp images and minimal reflection.
- > Swivelling viewing window built into instrument. Useful for instrumentation, cannot be mislaid.
- > High-quality handle: Chrome-finished upper section/refined plastic.

5.2.1.P.d. Keičiama AA baterija.

- > Attachment clip with integrated on/off switch. Secure. Switches off automatically when returned to the pocket. 20,000 switch cycles guaranteed.
- > Replaceable batteries. Size AA, or optional rechargeable battery with miniNT table charger*.

5.2.2.P.d. Šviesos šaltinis XML 2,5 V.

with mini3000 rechargeable handle (please order miniNT table charger separately)	D-001.71.200
without handle	D-001.71.105
XHL Xenon Halogen spare bulb	X-001.88.106

mini3000 apertures

Fixation star, large spot, small spot, hemispherical spot, red-free filter

*To upgrade to a rechargeable instrument with miniNT table charger, please see page 128.

TOKYO AUTOMATIC

• **32735 TOKYO SPHYGMO - adult - black cuff**
 Professional sphygmomanometer with large Ø 65 mm dial and button type air release valve. ABS light plastic case, and extra shock-proof ring for long durability.

360° rotary handle.
 Supplied with black nylon calibrated cuff with D-ring, black 1-tube PVC, latex free bladder and black, latex free PVC bulb in a nylon carrying bag and cardboard box.
 Multilanguage box and manual: GB, FR, IT, ES, DE, PT, GR, Arab.

CE 0476

For rapid (push) or gradual (screw) deflation

Press the button, rapid deflation

Screw the button, gradual deflation

ROMA SPHYGMOMANOMETERS - 4 DIFFERENT MODELS

5.3.2.P.d. Mažiausia manometro padalos vertė 2 mmHg

5.3.1.P.d. Arterinio kraujospūdžio matavimo diapazonas 0-300 mmHg

5.3.4.P.d. Oro išleidimo vožtuvas- metalinis atsukamas

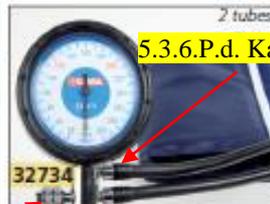

5.3.3.P.d. Korpusas iš atsparaus plastiko, diametras 60mm

Classic, lightweight, reliable palm model aneroid sphygmo with certified manometer ABS housing, integral PVC bulb and air release

Easy to read: large dial Ø 60 mm, with rubber protective ring.

Supplied in a nice nylon carrying bag with external velcro pocket and cardboard box

5.3.5.P.d. Manžetė suaugusiems normalaus dydžio

5.3.6.P.d. Kamera su dviem vamzdeliais, adult - 1 tube

• **32734 ROMA SPHYGMO - adult - 2 tubes**
 • **32709 ROMA SPHYGMO - pediatry - 1 tube**
 Same as 32727 but with pediatric cuff 35x11 cm

• **32728 ROMA SPHYGMO - adult - fluorescent - 1 tube**
 Same as 32727 but with special fluorescent dial plate to allow easy reading even in dark places.

Suitable for emergency.
 • **32856 PVC RIBBED BULB**
 • **32857 PVC PROTECTIVE RING**

ROMA MULTICUFFS KIT

• **32738 ROMA KIT - Sphygmo with 3 cuffs**
 Same as code 32727 but supplied with 3 cuffs: one pediatric (35x11 cm), one adult (49x15 cm) and one adult large (62x17.5 cm).
 Latex free.

EMERGENCY MULTICUFF KIT

• **32771 EMERGENCY SPHYGMO KIT - 5 cuffs**
 Palm type sphygmomanometer with orange silicone shockproof ring and orange cup of air-release valve. PVC tube and 1 tube TPU bladder.
 Supplied in a plastic carrying case with 5 cuffs: XS infant (13-19 cm), S child (18.4-26.7 cm), M adult (25.4-40.6 cm), L adult large (33.3-51 cm), XL thigh (40.6-66 cm)

RIESTER DUPLEX® 2.0 STETHOSCOPES, SIMPLY BETTER HEARING

5.4.1.P.d. Dviem akustiniams vamzdeliais

5.4.2.P.d. Dvipusis

RIESTER DUPLEX® 2.0 STAINLESS STEEL STETHOSCOPES

Duplex® 2.0 stethoscopes are distinguished by outstanding acoustic performance.

- They have been completely new constructed to meet the challenges of daily diagnostic practice. Special design tube for better auscultation of adults, children/babies or new-borns.
- precision double chest-piece made of stainless steel with innovative membrane support
- anatomically shaped binaural with internal multiple spring for adjusting the contact pressure
- extra-soft, replaceable and pivotable ear-tips for perfect sealing at the ear canal and enhanced wear comfort
- innovative acoustic system with extraordinary auscultation for all frequency ranges

- special membrane for precise acoustics

5.4.4.P.d. Atsarginių dalių komplektas: antgaliai-4vnt., membrana-2vnt.

Supplied with name plate, replacement ear-tips and membrane.

NEUROLOGICAL KIT

• 31265 NEUROLOGICAL KIT - 3 hammers
This kit includes 3 metal hammers in a foam box: Taylor hammer, Buck hammer and Babinsky hammer.

THERMO FEEL

• 31278 THERMO FEEL
Useful tool for diagnosis of neuropathy in diabetes patients. Both sides (one stainless steel and one plastic) are alternatively put in contact with foot skin of the patient. Patient perception of cool or warm allows a first diagnosis of diabetes.

TWO POINTS DISCRIMINATOR

• 31279 TWO POINTS DISCRIMINATOR
Plastic (ABS) caliper with scale printed on aluminium plate. Two point discrimination is the ability to discern that two nearby objects touching the skin are truly two distinct points, not one.

It is often tested with two sharp points during a neurological examination and reflects how finely innervated an area of skin is. Reliable and widely used technique for determining tactile gnosis.

TRIGONAL MONOFILAMENT

• 31277 TRIGONAL MONOFILAMENT
Trigonal shape diabetic monofilament with 3 different monofilament diameters: 0.4, 0.5 and 0.7 mm

MONOFILAMENT - SENSORY EVALUATOR

Supplied in pouch with multilingual user manual and 3 spare monofilaments:
• 31282 MONOFILAMENT TOOL - sensory evaluator
Plastic retractable monofilament with 3 spare monofilaments. Evaluates both diminishing and returning sensation (touch test). Examines levels of sensory function and changes in neuro status. Monofilament is calibrated at 10 g. Size: 13x2.5 cm + 4 cm monofilament
• 31281 KIT OF 3 MONOFILAMENTS - spare

SPIROTEL SPIROMETERS - BLUETOOTH OPTION

- 33471 SPIROTEL with WINSPIROPRO software
- 33472 SPIROTEL with Bluetooth and WINSPIROPRO software
- 33473 SpO₂ PROBE - 5.6.3.P.d. Ekranas 160x80 pikselių
- 33410 MOUTHPIECES 5.6.8.P.d. Momentinis tyrimo atvaizdavimas ekrane

A pocket laboratory which integrates 4 devices in one:
 - spirometer with touch screen display
 - triaxial accelerometer with motion analysis for therapy monitoring
 - SpO₂ probe
 - compatible with Qualcomm
 5.6.5. Matavimo ribos +16L/s
 5.6.6.P.d. Matavimo paklaida: srauto +5% arba 200ml/s ir tūrio +3% arba 50ml

5.6.12. P.d. Svoris 150 g.

TECHNICAL SPECIFICATION	
Flow sensor:	8-directional digital turbine
Flow range:	±16L/s ±3% or 50 ml
Dynamic resistance:	<0.5 cm H ₂ O/s
Measured parameters:	Flow accuracy ±5% or 200 mL
SpO ₂ range:	70-100% (normal) or 50-100%
Pulse rate range:	30-200 bpm
Data transmission:	Temperature sensor: Semiconductor (0-45°C)
Memory capacity:	Readings on spirometer: FVC, FEV1, FEV, FEF 25/75
Power supply:	Readings on PC with WinSpiro PRO: same parameters as Spirobank G
	5.6.1.P.d. Matavimo testai FVC ir FEV1
	5.6.10.P.d.USB jungtis

DISPOSABLE AND RE-USABLE TURBINES FOR MIR SPIROMETERS

- 33507 DISPOSABLE TURBINE WITH INTEGRATED MOUTHPIECE - box of 60
 Single patient use. Low cost and high accuracy. Individually packed to guarantee maximum hygiene. Easy to replace, no calibration needed.
 Compatible with GIMA codes: 33509, 33511-14, 33518-22, 33527-29, 33530, 33532, 33534.
- 33526 RE-USABLE TURBINE - bayonet
 Easy to replace, no calibration needed. Compatible with GIMA codes: 33511-14, 33518, 33520-22, 33528-32, 33534.

MOUTHPIECES FOR MOST SPIROMETER BRANDS

Paper mouthpieces (disposable) and plastic mouthpieces (re-usable for most brands of spirometers and peak flow. Paper mouthpieces are packed in individual transparent pouch.

- Unbreakable and shock resistant
- Inexpensive to replace

To keep the turbine working as it should, it must always be disinfected before use on a new patient to ensure the best possible hygiene and safety standards

To properly interpret the results of a spirometry test, it is essential to compare them with the so-called **normal values** that are calculated using standardised patient data or with **personal reference values** associated with that specific patient's clinical history. An individual patient's clinical history values can vary significantly from normal values that always refer to a "healthy" subject.

Spirote!® can be connected to a computerised system for configuration. The spirometric data from every test is stored in the device and can be transferred to a server and displayed (flow/volume curves, spirometric parameters, oximetric parameters optional).

The device can be connected to a PC via a micro USB port to recharge the battery.

Oximetry function

The oximetry sensor features two light emitting diodes (LED), one emits visible red light and the other infra-red. Both bands of light pass through the finger to reach a light detector. During the passage through the finger, some of the light is absorbed by the blood and soft tissue depending on the concentration of haemoglobin. The amount of each light frequency absorbed depends on how oxygenated the blood is inside the tissue.

This operating principle ensures accurate and reproducible readings without the need to constantly calibrate the device.

The oximetry sensor can be disinfected with Isopropyl alcohol.

The **Spirote!**® eHealth Mini-Lab can also be configured through the Bluetooth connection. A remote hub allows the device to be configured using the options offered by the communication protocol. This protocol allows the user to define the functions to be used, the parameters to be recorded and all of the test settings required.

The device can also be used on the default "factory" settings. The following notes illustrate the base settings and the functions that can be set by the user.

1.7 Technical specifications

Below is a complete description of the specifications for the device, the volume and flow turbine and the oximetry sensor.

1.7.1 Spirometer specifications

Parameters measured:

Symbol	Description	U.M.
FVC	Forced Expiratory Vital Capacity (cL)	cL
FEV1	Forced Expiratory Volume after 1 sec (cL)	cL
PEF	Peak Expiratory Flow (cL./sec)	cL./s
FEF2575	Value of parameter FEF2575 (cL./sec)	cL./s
Flow/volume sensor		Bi-directional turbine
Temperature sensor		semiconductor (0-45°C)
Method of detection		Infra-red interruption
Maximum volume measured		10 L
Flow rate		± 16 L/s
Volume accuracy		± 3% or 50 mL
Flow accuracy		± 5% or 200 mL/s
Dynamic resistance at 12 L/s		<0.5 cmH ₂ O/L/s

1.7.2 Oximeter specifications

Specification:

Method of detection	Red and infra-red light absorption
Measuring range of %SpO ₂	0 – 99% (with 1% increments)
Accuracy of %SpO ₂	± 2% between 70-99% SpO ₂
Number of beats for calculating the median SpO ₂ %	8 beats
Measuring range Pulse rate	18 – 300 BPM
Resolution of pulse rate	1 BPM
Accuracy Pulse rate	± 2 BPM or 2% of highest value
Interval for calculating median pulse rate	8 seconds
Signal quality	0 - 8 display segments

5.6.4.P.d. Normų skaičiavimo metodika: 8 metodikų

**WARNING**

All the maintenance operations described in the User Manual must be carried out with great care. Failure to follow these instructions may lead to incorrect readings or the incorrect interpretation of readings that have been taken.

All modifications, adjustments, repairs and reconfigurations must be performed by the manufacturer or by personnel authorised by the manufacturer. In the event of problems, do not attempt to make repairs. The setting of configurable parameters must be performed by qualified staff. The incorrect setting of parameters however will not compromise a patient's state of health.

The high frequencies emitted by an "electronic" device can interfere with the functioning of the device. For this reason, a minimum distance (of several metres), must be observed if there are other devices in operation in the same area. Examples of such devices include TVs, radios, domestic appliances, mobile phones, cordless phones etc.

The device may provide inaccurate readings in the presence of strong electromagnetic sources such as electrosurgical scalpels or medical devices such as CT equipment.

Do not use the device in the presence of MRI equipment that can generate an induced current in the oximetry sensor and harm the patient.

If the device is used in conjunction with other items of equipment, only equipment that complies with current safety regulations can be used so as to meet the safety standards laid down by EN 60601-1-1

As regards the disposal of Spirotel® devices, accessories, plastic consumables (mouth pieces), removable components and items that are subject to ageing (e.g. the battery) only use suitable containers or better, send the materials to the device manufacturer. Environmental requirements must be complied with in all cases.

5.6.11.P.d. Maitinimas iš tinklo ir vidinio akuliatoriaus

MIR will relieve MIR of all responsibility from any direct or indirect claim for damages.

Use only the battery specified in § Technical Specifications.

The device can also be powered using a **USB** cable connected to a computer thus also allowing on-line operation.

Keep the device out of the reach of children and differently able persons.

1.3 Warnings regarding use of the lithium ion battery

The device is powered by a rechargeable lithium ion battery. The power supply is 3.7 V.

For correct use of the device, read the following instructions carefully.

**WARNING**

Only use batteries supplied by MIR.

Improper use of a battery could lead to an acid leak, the emission of heat and fumes or even explosion or fire.

This could lead to deteriorated performance or damage to the battery or protective device installed in the pack. It could also damage equipment or harm the user.

Pay close attention to the following instructions.

DANGER

Do not open or modify the battery. The pack is fitted with an internal protective device; if the unit is mishandled an acid leak, the emission of fumes or even explosion or fire could follow.

Do not short the positive (+) and negative (-) terminals with metal objects.

Do not place the battery in a pocket or in a bag along with metal objects such as items of jewellery, hairpins, coins or keys.

Do not keep the device near such items.

Do not heat the battery or throw it into the fire.

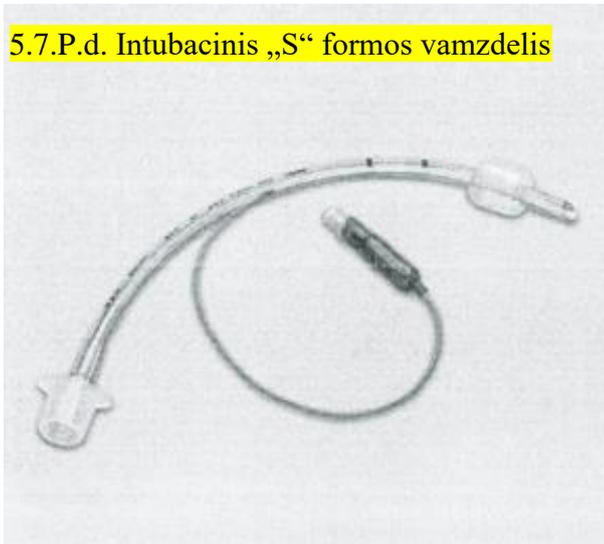

Do not use or store the battery near a fire or in a car where the temperature can reach over 60°C.

Do not immerse the battery in water or seawater and do not leave it wet. In the event of the battery getting wet, the internal protective device could be damaged leading to a recharge at very high voltages and currents. Chemical reactions might also take place that lead to an acid leak, the emission of fumes or even explosion or fire.

Do not recharge the battery near a fire or in very hot surroundings. High temperatures can activate the internal protective device preventing the battery from recharging or can damage the protective device itself causing a recharge at very high voltages and currents. This could cause chemical reactions that could lead to an acid leak, the emission of fumes, rupture of the device or even explosion and/or fire.

Recharge the battery with a charger that complies with the specifications given in section 1.7.3 A recharge carried out using an unsuitable charger and under non-conforming charging conditions can cause the pack to over-charge or to a recharge at

Needle in AISI 304 stainless steel triple bevelling

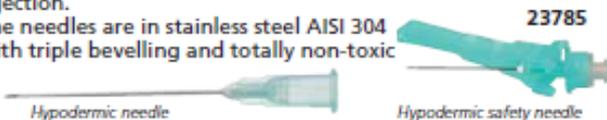

HYPODERMIC NEEDLES AND SCALP-VEIN SETS - STERILE

A line of hypodermic needles and scalp vein sets ensuring minimal trauma during penetration thanks to the triple bevelling. Each element of the needle is treated for painless injection.

The needles are in stainless steel AISI 304 with triple bevelling and totally non-toxic

and non-pyrogenic. Needles have Luer-slip cone, can be mounted on syringes with Luer-slip or Luer-lock. The scalp vein set needles are provided with soft flexible grained wings. The tube is made of 30 cm PVC with luer-lock. Individually packaged in blister. Box and instructions: GB, FR, IT, DE, ES, PT, GR, RU (Scalp-vein sets) GB, IT, ES, PT (Hypodermic needles).

Smartscope PRO - Next generation hand-held fundus camera

Optomed Smartscope® PRO is the leading portable medical camera that enables both non-mydriatic fundus imaging and anterior segment imaging with one device.

Smartscope PRO with optics module EY4 is an easy to use tool for screening the eye fundus to detect early signs of the most common retinal abnormalities, such as diabetic retinopathy, glaucoma and AMD.

The attachable anterior module ES2 provides high resolution digital image data of anterior segment of the eye.

Eye anterior image

Smartscope PRO - Feature highlights

- High image quality fulfills ISO 10940 fundus camera standard
- Non-mydriatic eye fundus examination through undilated pupil
- Field of view 40 degrees
- 9 internal fixation targets for peripheral imaging
- Accurate and silent Autofocus and shoot
- WiFi for easy image transfer to any PC, laptop, tablet or mobile device
- Slit Lamp Adapter for any Slit Lamp with patient head rest
- Optomed Workstation software with DICOM for image viewing, sharing and archiving
- **Low flash light intensity**
- Smartscope ES2 module for high quality cornea imaging

9.9..P.d. Apšvietimas turi galimybę reguliuoti šviesos intensyvumą

Smartscope PRO - Multipurpose screening tool for you

- Baseline fundus screenings
- Fits even in the most compact shops
- Ideal tool for bed bound patients and patients who are outside the reach of traditional healthcare, or with limited mobility
- Easy and fast screening of childrens' eyes
- Suitable also for ROP screening for babies down to 2.5 kg
- Early assesment of neuropathy and monitoring of post neuro surgery optic nerve swelling
- Compact and suitable for mobile eye screening camps and mobile camp vehicles
- Effective screening of diabetic retinopathy in all stages
- Slit Lamp Adapter for more stationary setup
- Patient data management software with remote consultation possibility
- Optimal from small local clinics to centralized hospitals

15. Technical description

CAMERA:

Type:	OPTOMED SMARTSCOPE M5
Image sensor:	CMOS, 5.0 Megapixels
Image memory type:	Micro SDHC card or WIFI SDHC card
Display:	2.4", TFT-LCD, 262 000 colors, antireflective coating
Image format:	JPEG (the extension) .jpg
Video format:	MPEG-4 and MPEG-1
USB Connectivity:	PC with USB or WIFI (WPA2)
WIFI Connectivity:	802.11gn, WPA2 Frequency range: 2412 – 2462 MHz

Image format:	JPEG (the extension) .jpg
Video format:	MPEG-4 and MPEG-1
USB Connectivity:	PC with USB or WIFI (WPA2)
WIFI Connectivity:	802.11gn, WPA2 Frequency range: 2412 – 2462 MHz
Operating systems:	Windows 7*, Windows 8*, Windows 10* No driver installation needed.
Dimensions:	82,30(w) x166,50(h) x 66,50(d) mm
Weight:	400 g
Battery:	Rechargeable Ni-MH Cylinder cell, 4xAAA, 4.8 V, 1000 mAh User can change battery. Batteries provided by Optomed.
Usage time:	1h 30min with full battery

CHARGING CRADLE:

Type:	OPTOMED SMARTSCOPE CRADLE V1
Dimensions:	170(w) x 35(h) x 150(d) mm
Weight:	380 g
Switching power supply connected to cradle:	CINCON TRG10R090, Input: 100-240 V ~0.4A 47-63 Hz, Output: 9V, 1.1A, 10 W
USB cable:	Type A to mini B, high-speed, unshielded, length 1.8 m

CAUTION

It is only allowed to attach Battery and Power source provided in the sales package into the Cradle. If you need replacement to the Battery or Power source, please contact Optomed Customer Service or your local Retailer.

NON-MYDRIATIC OPHTHALMIC MODULE CONNECTED TO SMARTSCOPE M5 CAMERA

Type: Smartscope EY4

9.9.P.d. Apšvietimas infraraudonųjų spindulių LED tipo šviesos šaltinis
intended use: Intended to capture digital images and video of the fundus of the human eye.

Illumination: Infrared LED for targeting
Visible white LED for photographing , 10 illumination brightness levels
9 red Internal fixation target LEDs

Maximum Luminance output level towards eye: 95,8 cd/cm²

Field of view: 40°
Diopter compensation: - 20 D to + 20 D

Image resolution: 1536x1152 px (total 1,8 Mpix, informational area 1,41 Mpix)

Dimensions: 160x73mm
Weight: 310 g

FUNDUS ANGIOGRAPHY MODULE CONNECTED TO SMARTSCOPE M5 CAMERA

Type: Smartscope FA

Intended use: Intended to capture digital images of the fundus angiograms of the human eye.

Illumination: Infrared LED for targeting
Blue LED for photographing, 10 illumination brightness levels
9 red internal fixation target LEDs

Maximum Luminance output level towards eye: 8,07 cd/cm²

Field of view: 40°
Diopter compensation: - 20 D to + 20 D

Image resolution: 1536x1152 px (total 1,8 Mpix, informational area 1,41 Mpix)

Dimensions: 160x73 mm
Weight: 310 g

9. Retinal imaging using optics module Smartscope EY4

Optomed Smartscope EY4 digital ophthalmic camera is intended to capture digital images and video of the fundus of the human eye. The device set for retinal imaging consists of:

- Camera handset M5
- Attachable ophthalmic lens EY4

9.9.P.d. Apšvietimo taikymui naudojamas infraraudonųjų spindulių šviesos šaltinis vaizdo fokusavimui, LED tipo matomas šviesos šaltinis akies dugno apšvietimui. Galima reguliuoti šviesos intensyvumą.

Smartscope EY4 is intended for non-mydriatic imaging. This means that infrared is used for targeting image to the eye fundus and visible light is flashed when image is taken. Pupil does not respond to the infrared light so examination is convenient for the patient. Constant illumination can be selected from device menu if mydriatic drops are used. Pictures can also be taken using infrared light for both aiming and capturing.

Smartscope EY4 has 9 internal fixation targets for the patient to fixate at while imaging. Below section will guide how to control the fixation lights.

STEPS FOR RETINAL IMAGING:

1. The examination room should be as dark as possible.
2. Both the patient and the examiner shall be seated while taking the images.
3. Either autofocus or manual focus can be used. Autofocus range is -11 to +3 diopters.

If patient has a refractive error and **autofocus is off**, focus need to be adjusted:

- Hyperopia: camera is focused to distance by pressing arrow key up. One click of the key is approximately 1 Diopter.
 - Myopia: camera is focused closer by pressing arrow key down. One click of the key is approximately 1 Diopter.
4. Aiming light is automatically turned on when camera enters live view.
 5. Middle fixation target is lit when pressing left soft key and it provides a macula centered image. To change the fixation target press Left Soft Key and use arrow keys to navigate between the 9 targets as shown in the graphics in lower left corner of the display. If fixation target is turned off ask patient to look at a target in a wall 2-3 meters behind the operator.
 6. Capturing light is adjusted using left and right arrow key. There are brightness levels from 0 to 10, default value is 5, and typical levels are from 2 to 8. There are also low brightness levels 0.2, 0.4, 0.6 and 0.8 if brightness level 1 is too bright.

When using IR/White capture mode changing illumination brightness affects only the white capturing flash. If using IR/IR or White/White both aiming and capturing light are changed.

7. Aim help circle on the screen guides user when to take image. When retina is not fully in view the circle is red. Once the aim is good and retina fully appears on screen the circle turns green indicating a good moment for capturing the image.
8. Approaching the eye is started from 10 centimeters (4 inch) distance. If internal fixation target is not used patient is asked to look at a target in a wall 2-3 meters behind the operator (patient's eye targets to infinity and stays still). Pupil is approached until the reflection from the eye fundus can be seen.

9.20.P.d. Garantija 24 mėn.
