

0.9 mm UltraChopper™ Tip

Ultrasonic pre-chopper for more efficient emulsification

8065751789

Six (6) Units per Box

- * Ultrasonic tip facilitates chop techniques
- * Allows for secure and easy division of dense nuclei
- * Optimized performance with OZil® Torsional Handpiece

Another innovation in micro-coaxial technology to enhance emulsification especially in dense cataracts

Curved designs allows for pre-chopping techniques without touching iris, capsulorhexis or capsule

Blade designed to reach approximately 30% to 50% of nuclear thickness

Compatible with 0.9 mm family of MICROSMOOTH® Sleeves

- Easier wound entry
- Reduced stress on ocular tissue
- **INTREPID® Micro-Coaxial** compatible
