Sensation

Sensuality

- Experience a new standard of working comfort and tactile feel
- Explore a new level of control and precision
- Enjoy a new level of clinical performance and security
- Experience a new World of Endo-Sensations

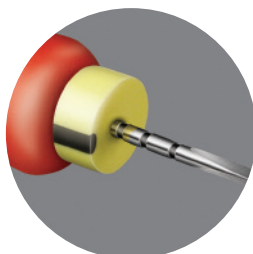

Start Enjoying Your Endo

senseus™

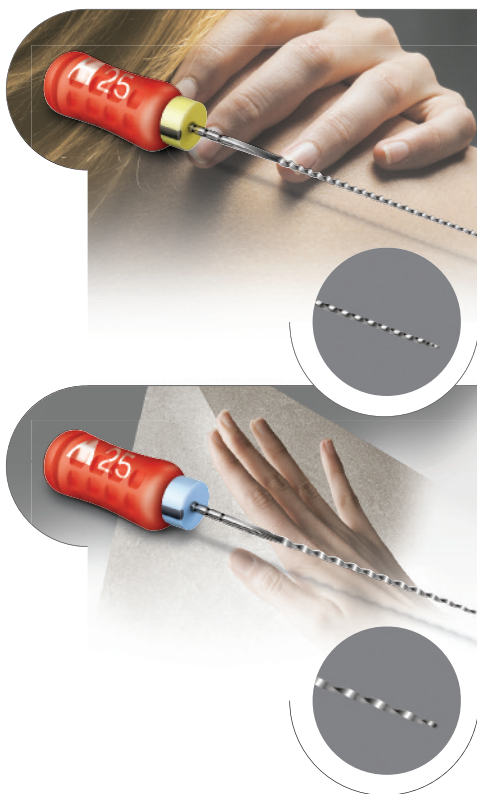

The large, soft, ergonomic silicone handle transforms your working sensations and improves your clinical performance.

- Greater Working Comfort
- Improved Torque and Force Transmission, due to :
 - Reduction of effort achieved by large handle
 - Excellent grip when used with gloves
- Improved Tactile Feedback
- Reduction of Fatigue

X-ray visible calibration rings will improve your clinical performance during endodontic procedures, through :

- Improved Diagnostics
- Increased Accuracy
- Greater Visibility

FlexoFile® FlexoReamer®

The highly flexible instrument blades with guiding action preserve canal morphology and improve clinical security.

- More Reliable Instrumentation of Canals
- Reduced Risks of Transportation, Ledging and Perforation
- Reduced Risk of Fracture of Instruments

Triangular Cross-Section*

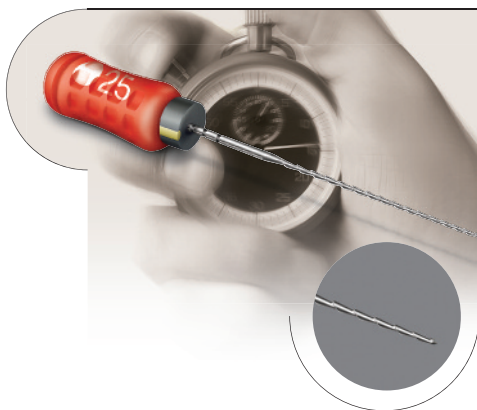

- High Flexibility
- High Cutting Efficiency

Batt® Tip

- Non-Cutting 55° Batt® Tip** with Rounded End
- Safe and Secure Guiding Action

* ISO 015 and up; square cross-section for smaller sizes

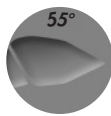

Hedstroem

- Improved Preservation of Canal Morphology and Reduced Transportation and Ledging
- Excellent Cutting Efficiency

High Quality Blade

- Proven Instrument Design
- High Quality Swedish Steel

Guiding Tip

- Non-Cutting 55° Tip**
- Guiding Action

** 75° tip for instrument sizes ISO 055 and up

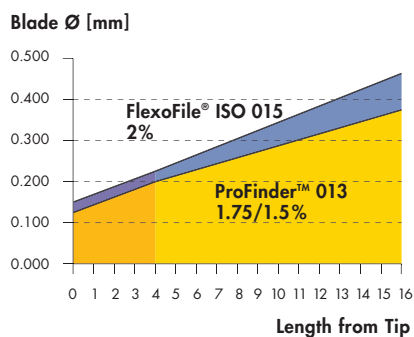

ProFinder™

Root Canal Catheterization File

ProFinder™ features an exclusive minimal, variable taper, giving you unmatched root canal catheterization capabilities.

- Easier to Establish the Glide Path
- Faster and More Efficient Negotiation of Difficult or Calcified Canals
- Easier Penetration of Canal
- Better Tactile Feel

Variable & Minimal Taper Blade

- Square Cross-Section with Increased Taper in Tip Region
 - Increased buckling resistance
- Minimal Taper Behind Tip Region
 - Higher instrument flexibility

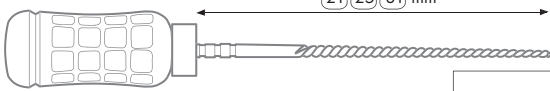

Guiding Tip

- Non-Cutting 65° Tip with Rounded End
- Guiding Action

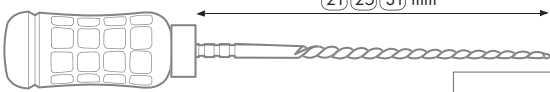

*“If you own the glide path,
you can consistently win the rotary
game of endodontics.”*

Dr. Clifford J. Ruddle
