

lighting system does not have instant restrike capability, dimming the playing court area lights once the game has begun will not be allowed.

Lighting in all areas of the arena outside of the seating area must be maintained at a minimum of 380 lux and 90cm from the floor.

In the first and last Regular Season home game, the IFPC has the obligation to measure the lighting of the arena (playing court and seating area) and deliver the results to the Company's TV and New Media Rights Department.

The IFPC also has the obligation to measure the lighting of the playing court (centre area, free-throw area and the four corners) in every home game and deliver the results to the Company's TV and New Media Rights Department.

If an IFPC does not believe that these requirements are being met, based on their own lighting measurements, it will contact the Company's TV and New Media Rights Department and provide them with its lighting measurements so that they are able to address the situation.

Lighting during Team Presentations:

The use of different lighting, as considered most suitable for the event, will be allowed only during the presentation of the home team, provided that before tip-off, the lighting must be in accordance with the applicable arena rules and have the prior authorisation of the Company.

Once the game has started, the lighting in the playing court area may not be altered, except during half-time and only while the two teams are in the locker rooms.
